

## 2007 Sphagnum Bog Inventory

■ The 2007 blitz involved three surveys of the wetlands comprising the Sphagnum Bog.

■ Identified 133 plant species in the Sphagnum Bog from the surveys, bringing the total number of plants in this habitat to 183 plant species and one macrolichen. Previously, 123 species were listed by the Crater Lake herbarium for this area.

■ About 25 moss samples were also identified and deposited in the park herbarium.
